# Preliminary July 2021 Climate Summary for West Central and Southwest Florida

Temperatures across West Central and Southwest Florida are averaging slightly below normal to slightly above normal for July 2021 so far with a couple of locations on track to end up in the Top Ten Warmest for July.

Graphics Source: NOAA Regional Climate Centers

As for rainfall, it has been highly variable across the region which is not too unusual due to the random nature of our summer thunderstorms. Some areas are running well above normal rainfall (blue/green areas on right image below) while other locations are below normal (yellow/orange areas on right image below).
